Announcements

WRAP Workplan Implementation Guidance – [Completion, Dissemination and Sharing of Work Products and Deliverables](#) (*Darla Potter*)

Guidance was adopted by consensus on Oct 31, 2018 by the WRAP Technical Steering Committee (TSC) and Work Group Co-Chairs. A workgroup reaches consensus on a product. That product will be presented to the Technical Steering committee and then put on the Docket so people in any workgroup can review and ask clarifying questions.

Please look at link to see dissemination plan.

Docket - [https://www.wrapair2.org/TSC Docket.aspx](https://www.wrapair2.org/TSC_Docket.aspx)

Other announcements from work group members / advisors

None

December 4-6 WRAP Technical Planning Meeting (*Amanda Brimmer & Darla Potter*)

Overview from OGWG Perspective

25 people there plus 15 by phone. Discussion of deliverables and ideas for 2019. We went through crosswalk of workplan and updated the OGWG status.

Day 2 – talked through 8 tasks in more detail, i.e how far each state is in inventory and getting ready for regional haze.

Outcome for OGWG

Day 3 - Developed a plan for where we need to be. ID timelines. Some tasks are behind schedule, which will need to be adjusted in a revised workplan.

Revising workplan: Initial update mid-January for OGWG chapter of the workplan, revision mid-February, TSC Completion by end of March, and coming out in April for WRAP Board approval.

Prior to January 22 OGWG call, the co-Chairs will send out info for special workplan call in January to focus on the OGWG Workplan.

OGWG Road Map Phase II (John Grant & Amnon Bar-Ilan – Ramboll Environ)

Additional Tasks [See presentation in meeting invite]

Pg. 3 1g - Taking a look at the 2016 Inventory to compare to 2014 info compared to level of O&G activity change between 2016 from 2014. Are there and departures between emissions and level of activity.

“Factor-based” adjustments for 5 to 7 basins – will be useful to leverage historical data EPA has used an oil and gas tool to run 2016 activity data.

Pg. 4 1h – Ramboll holding conference calls with state agencies. Information exchange. There are differences between states. Some states will fill in and send to operators for review. Other states don't have data, will just send survey. Other states think current data is okay but will be focused on future years.

Will be making minor changes to the survey to send out to operators.

Also, finding out if states have in house data sources. Working on now.

Hope to have some sample language to states to send to operators.

Survey (Process, Status, Schedule) [See presentation in meeting invite]

Pg. 4-6 In Phase I right now.

Working with states to figure out what to send to operators.

Timeline under consideration based on feedback from calls.

When states filling out with internal data, Ramboll will be available to answer questions.

Western Energy Alliance will help with surveys.

Surveys were going to go out mid Dec. to operators but still doing state calls.

Timing for response may change. (Some states may focus on future year then timeline would be extended.)

Ramboll will analyze and report out then wrap up and finalize.

Ramboll has talked to every state except NM (who is schedule) that wanted to ask questions.

WY thinks John and Amnon have been helpful in finding path forward for this work/regional haze effort and thanks them for their work.

John – had call with several agencies, feel free to call about survey and or about delivering to operators.

Schedule – Pg. 7

Looking Forward [See presentation in meeting invite]

See page 9 & 10 of Ramboll presentation

Task 1 - Base year complete, in-progress survey work, then incorporate survey info, then agency comment time.

Task 2 Forecast for 2028 (on the book controls).

Task 3 & 4 not started.

Questions

Q: Are there specific things that we/OGWG need to highlight?

A: In Late Feb early March need help with comments on survey results memo and in April need OGWG comments on draft base year inventory (v2).

Q: Have federal agencies seen the surveys?

A: Surveys were only distributed to the regulatory agencies and Institute of Tribal Environmental Professionals (ITEP) under contract to Tribal Data Work Group (TDWG). As we move forward, survey will go to operators.

Q: Can federal agencies see what operators are being asked for but not that they would have input.

A: The OGWG will explore sharing the surveys sent to the regulatory agencies.

Next Steps & Planning for Next Calls (*Amanda Brimmer*)

Special Workplan Call January 22, 2019

9:00 am (AK), 10:00 am (PT), 11:00 am (MT), 1:00 pm (ET) – 60 minutes Note an hour earlier

Volunteer Call Note Taker – volunteer needed

A draft workplan will be distributed prior to the special January call for OGWG consideration.

Next Call February 12, 2019

10:00 am (AK), 11:00 am (PT), Noon (MT), 2:00 pm (ET) – 90 minutes

Volunteer Call Note Taker – volunteer needed

Need to have whole group approve workplan by consensus on Feb. call. (May have to have a special call if can't reach consensus so can be done by March due date.)

If volunteer note takers do not step forward, the OGWG will need to move to “volun-told”.
